

POLY CLOUDCONNECT POWERED BY PEXIP FOR GOOGLE MEET

Allow video conferencing systems and other third party solutions to join your Google Meet video calls. Perfect for third-party SIP/H.323 video conferencing systems and Skype for Business clients.

CREATED FOR GOOGLE MEET

Video interoperability for Google Meet was developed in partnership with Google. It allows anyone to join Google Meet meetings from meeting room devices.

MADE FOR ENTERPRISE – PERFECT FOR SMB

Poly CloudConnect powered by Pexip is available both as a dedicated enterprise application and as a service. It is designed to meet the requirements of any company with regards to user experience, security, manageability, and reliability.

EASY TO USE AND MANAGE

Poly CloudConnect powered by Pexip natively integrates with the Google Meet workflow and all users benefit from the familiar experience, regardless of how they join meetings. And IT can easily manage it all in a single view.

NATIVE INTEGRATION

Poly CloudConnect powered by Pexip for Google Meet lets you natively enable traditional video conferencing systems and leading video capable clients to join Google Meet calls.

SHARE, COLLABORATE, CREATE, AND PRODUCE

You can natively share your screen and content between everyone with ease. From Google Meet to video conferencing and other collaboration solutions. To and from anyone.

REDUCE COST AND USE WHAT YOU HAVE

Sure, it sounds like a broken record, but use your existing video conferencing endpoints. Don't replace. Just add more. With Poly CloudConnect powered by Pexip you integrate Google Meet with what you already have. Simple.
