PRO SERIES TOUCHPANELS

Powerful and Intuitive Control Interfaces for AV Systems

▶ TouchLink® Pro touchpanels in sizes from 3.5" to 17"

▶ Transform TouchLink Pro touchpanels into powerful, all-in-one control systems with LinkLicense and the TLCA 1

▶ TLI Pro 201 4K TouchLink Interface - Use a third party 4K touchscreen display within your control system

▶ GUI Designer Software - Efficiently create TouchLink Pro user interfaces

Extron

TOUCHLINK PRO

In many ways, the choice of a control interface dictates a user's overall satisfaction with the AV system. That's why we design our TouchLink® Pro user interfaces to exceed expectations for ease-of-use, then place equally-strict goals on features, security, and smooth, worry-free integration. Our TouchLink Pro family works with any IP Link Pro control processor and is designed for use in AV system applications that requires easy, complete, interactive control of a broad range of source devices.

TouchLink Pro Touchpanels

This series includes full-featured, customizable touchpanels that range in sizes from 3.5" up to 17", available in a variety of mounting options including tabletop, wall mount, and flip-up Cable Cubby enclosures. Several models feature vibrant, capacitive touchscreens with edge-to-edge glass, and multi-source, high-resolution video preview.

LinkLicense for TouchLink Control and the TLCA 1

Extron LinkLicense for TouchLink Control and the TLCA 1 TouchLink Control Adapter are powerful Pro Series control options that will transform your wall mount, tabletop, and Cable Cubby TouchLink Pro touchpanels into powerful, all-in-one control systems. They will add flexibility and power to our latest TouchLink Pro touchpanels, including the TLP Pro 525 Series, TLP Pro 725 Series, TLP Pro 1025 Series and TLP Pro 300M.

4K TouchLink Interface – TLI Pro 201

The Extron TLI Pro 201 is a TouchLink® Interface that allows a third-party 4K touchscreen display to be used as a point of control within an Extron Pro Series control system. This unique interface includes a scaled HDCP 2.3-compliant HDMI input for video preview, supporting resolutions up to 4K/30. The scaled output supports signal resolutions up to 4K/30 at 4:4:4.

The TLI Pro 201 has built in annotation features, allowing a presenter to draw and point on 4K video or computer sources using a third-party touchscreen display and/or mouse. It also features the convenience of PoE, which allows it to receive power and communication over a single Ethernet cable.

GUI Designer Software

Extron GUI Designer is used for the design, creation, and maintenance of Extron TouchLink Pro user interfaces. Begin with ready-to-use design templates and resource kits, or start from scratch and build your own layout using our comprehensive software. The available design elements are fully customizable and matched carefully to popular AV system applications.

TouchLink Pro Themes

Extron pre-configured design themes to help streamline and accelerate the TouchLink Pro user interface development process. These are ideal for single display rooms, dual display rooms, divisible rooms, multi-image systems, and videoconference suites.

Extron Control

Extron Control is an easy-to-use AV control system app that gives users complete access to Extron control systems directly from Apple iOS or Android devices. It is available for download from the App Store and Google Play.

TLI Pro 201

4K TouchLink Interface with Built-in Annotation

The Extron TLI Pro 201 is a TouchLink® Interface that allows a third-party 4K touchscreen display to be used as a point of control within an Extron Pro Series control system. This unique interface includes a scaled HDCP 2.2-compliant HDMI input for video preview, supporting resolutions up to 4K/30. The scaled output supports signal resolutions up to 4K/30 at 4:4:4. The TLI Pro 201 has built in annotation features, allowing a presenter to draw and point on 4K video or computer sources using a third-party touchscreen display and/or mouse.

Features

- Utilize a third-party 4K touchscreen display as a point of control within an Extron Pro Series control system
- Compatible with third-party touchscreen displays up to 4K/30 at 4:4:4
- Compatible with all IP Link Pro control processors and HC 400 Series Meeting Space Collaboration Systems

- HDCP 2.2-compliant HDMI Input for full-motion video preview and monitoring
- One high speed USB 2.0 port for third-party touchscreens or HID support
- PoE+ compatible
- Built in annotation features
- Intuitive graphical annotation interface
- Can be used in conjunction with Extron Annotator 300 for advanced annotation capabilities

Extron IPCP Pro 255Q xi IP Link Pro Quad Core Control Processor
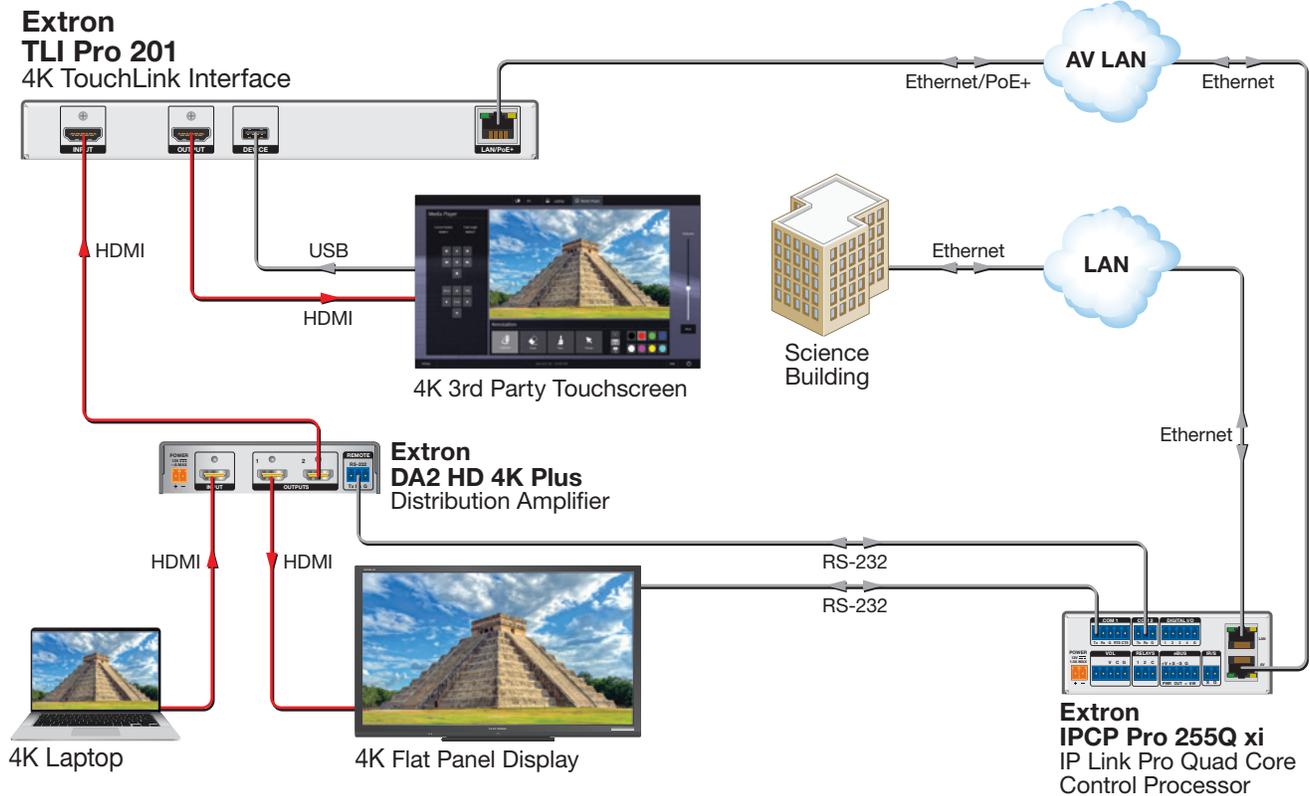

Transform your TouchLink Pro Touchpanel into a Powerful All-in-One Control System

Extron LinkLicense for TouchLink Control and the TLCA 1 TouchLink Control Adapter are two powerful Pro Series control options that will transform your wall mount, tabletop, and Cable Cubby TouchLink Pro touchpanels into powerful, all-in-one control systems. These innovative tools add flexibility and power to our latest TouchLink Pro touchpanels, including the TLP Pro 525 Series, TLP Pro 725 Series, TLP Pro 1025 Series and TLP Pro 300M.

Integrated touchpanel control systems provide many advantages including simpler system designs and streamlined system deployment. In addition, when you introduce a touchpanel control system into a room where an Extron touchpanel and a control processor already exists, you will be able remove the control processor from the system and use it elsewhere.

LinkLicense for TouchLink Control

Extron LinkLicense for TouchLink Control is a powerful, easy way to turn your TouchLink Pro touchpanel into a full-featured, standalone control system. With this LinkLicense, you can control your AV devices via Ethernet directly from the Ethernet port on the touchpanel. And, by adding the optional TLCA 1 TouchLink Control Adapter, you can control a broad range of system devices directly from the touchpanel using the variety of ports on the control adapter.

TLCA 1

The Extron TLCA 1 is a TouchLink Control Adapter designed to add traditional control ports to your touchpanel installed with LinkLicense for TouchLink Control. It features two bidirectional serial ports, one digital input, one IR port, and two relays for control of sources, directly at the touchpanel.

GUI DESIGNER

User Interface Design Software for TouchLink® Pro

Extron GUI Designer is a software application used to design, create, and maintain Extron TouchLink® Pro user interfaces. Begin with ready-to-use design templates and resource kits, or start from scratch and build your own layout using our comprehensive software. The available design elements are fully customizable and matched carefully to popular AV system applications. In many cases, all the input sources, display control, and environmental settings are already in place. These resources are fully developed and include complete, detailed documentation.

Ready-to-use Templates and Resource Kits
GUI Designer includes ready-to-use templates for single display rooms, dual display rooms, divisible rooms, multi-image systems, and videoconference suites that can be used for TouchLink Pro products. Since system designs vary, our templates can be customized to suit the specific needs of any application. The GUI Designer design environment enables a wide variety of design choices for buttons, colors, logos, font styles, and more.

Start From Scratch and Design Your Own Layout
A wide array of design options enables users to develop their own touchscreen layouts to meet almost any system requirement. The GUI Designer resource library of shapes, graphics, and fonts provide a wide variety of choices for design of pages and pop ups to provide transport controls, multi-state buttons, 3D effects, video windows, dynamic text, and more. In addition, users can import their own images and font files into GUI Designer and use the resource management tool to provide further customization capabilities. The Designer Window displays the layout design in progress, so the changes can be seen while the customization occurs.

Object Layering Indicator
Notifies the user that there is at least one object that is being covered by another

Dynamic Scaling
Allows easy conversion of GUI designs between different size touchpanels

Share and Transfer Projects
Easily share and transfer projects while preserving all project resources

Intuitive Drag-and-Drop Interface
Familiar, easy-to-use menus and toolbars

Resource Library
Buttons, borders, 3D effects, shapes, graphics, fonts, and more

Workspace Window
Quick point-and-click access to multiple projects and individual project pages

Properties Window
Provides quick view and edit of object properties

Controls Window
For adding basic buttons, level indicators, date/time displays, video windows, and more

Designer Window
Displays layout of main page and popup pages

Control States Window
Easily modify and customize the visual states of a button

Extron Control Systems Certification Programs
Establish Your Knowledge of Extron Control Systems

Extron offers three control systems certification programs designed to prepare individuals to successfully deploy and maintain customized AV control systems built around our Pro Series control systems.

Certification Comparison

Extron Control Specialist - ECS

Extend Your Ability to Customize and Manage Extron Pro Series Systems

Course Content

ECS is a two-day course that consists of the following general categories:

- Learn Global Configurator Plus, and use its powerful capabilities to configure and manage Extron Pro Series control systems
- Control system design concepts
- Configure a wide range of room control functions using Global Configurator Plus
- Create custom control interfaces using GUI Designer software, plus GUI design best practices
- Validate Pro Series control systems in multiple AV environments using acquired knowledge of installation, configuration, and commissioning principles

Extron Control Professional - ECP

Unleash the Power of Global Configurator Professional for Advanced Extron Pro Series Control Systems

Course Content

ECP is a three-day course that consists of:

- Learn Global Configurator Professional software and the advanced features used in complex system designs
- Sophisticated control system design concepts and advanced configuration techniques
- Create custom control interfaces using GUI Designer software, plus GUI design best practices
- Validate complex Pro Series control systems in multiple AV environments using acquired knowledge of installation, configuration, and commissioning principles

Extron Authorized Programmer - EAP

Learn Global Scripter and ControlScript to Design Powerful, Programmable Control Systems

Course Content

EAP is a four-day course that consists of:

- Use Global Scripter software and ControlScript, the Extron Python library for AV professionals, to program Extron Pro Series Control Systems
- Apply best practices and troubleshooting techniques to ensure optimum system performance
- Utilize methodologies for implementing and developing reusable modules for control system programs
