## When Flexibility Meets Innovation

The hybrid work model has been in place at many organizations for some time, with varying levels of success. One thing is clear - to keep your team as engaged and productive as possible - old-school tactics and tools need to change.

With the **Google Meet Series One by Avocor** solutions, you can easily overcome the challenges surrounding the modern workplace. Hands down the best solutions available to enable efficient and collaborative meetings in any environment, any setting.

## Effortless and Immersive Hardware for Any Space

### How You Work

The link between engagement and performance is well known, and the need for superior meeting technology that provides the same video collaboration experience and interactivity - no matter where you're at - is key to successful outcomes.

### Where You Work

Whether at your home office, a huddle space, or in a large meeting room, your tech of choice has to perform and be easy to use. Good news - Avocor has partnered with Google to develop two hardware platforms designed to deliver the immersive experience you need to be the most effective.

## Google Meet Series One Desk 27 by Avocor

This 27" all-in-one premium touchscreen Google Meet device does it all, right on your desktop. Specifically designed for executive and home offices as well as 1-2 person rooms, phone booths and hot desks, Desk 27 is a desktop monitor and a laptop docking station with Jamboard app capabilities built right in for ease of use and true collaboration.
