

Transform your video  
conferencing experience with  
multi-share collaboration

Available on the Cisco  
Global Price List  
(GPL)

**Mezzanine** enhances your meetings with a suite of powerful collaboration features that perfectly complement your **Cisco Webex Room** devices. Share content from multiple contributors and locations at the same time. Flexibly arrange your content in a dynamic, shared workspace. Upload, download, and annotate work in real-time. The best voice, video, and content experience available transforms your meetings from regular video calls into high-performance working sessions.

# Advanced benefits of integrating Mezzanine and Cisco Webex Room systems

- **Bring your teams together**

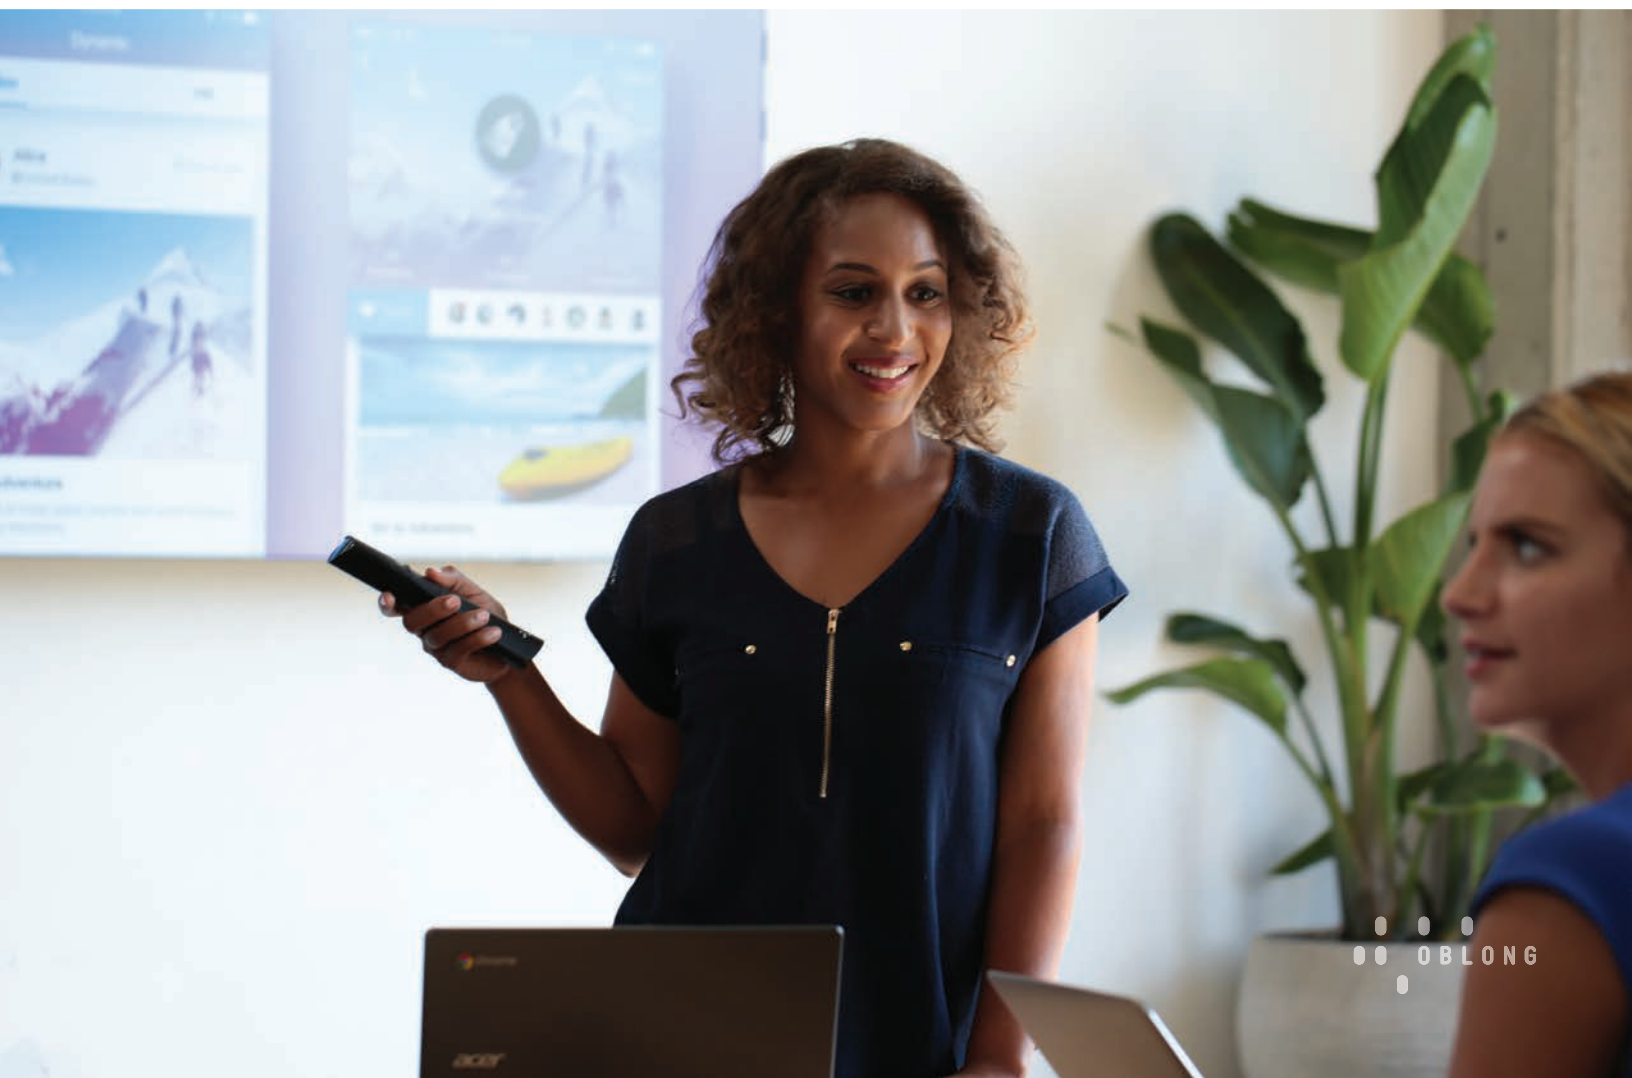

Mezzanine creates a common workspace that is accessible to multiple locations. Users in different places can see and share content like they're in the same room.

- **Lead more engaging meetings**

Content is a first-class citizen in your meeting. Zoom in on important details, place content side-by-side for comparison and cross-referencing. Capture any content during the meeting to annotate or share.

- **Communicate more effectively**

Use the award-winning Mezzanine wand to arrange and highlight content in the most impactful way so your team is focused on what matters the most.

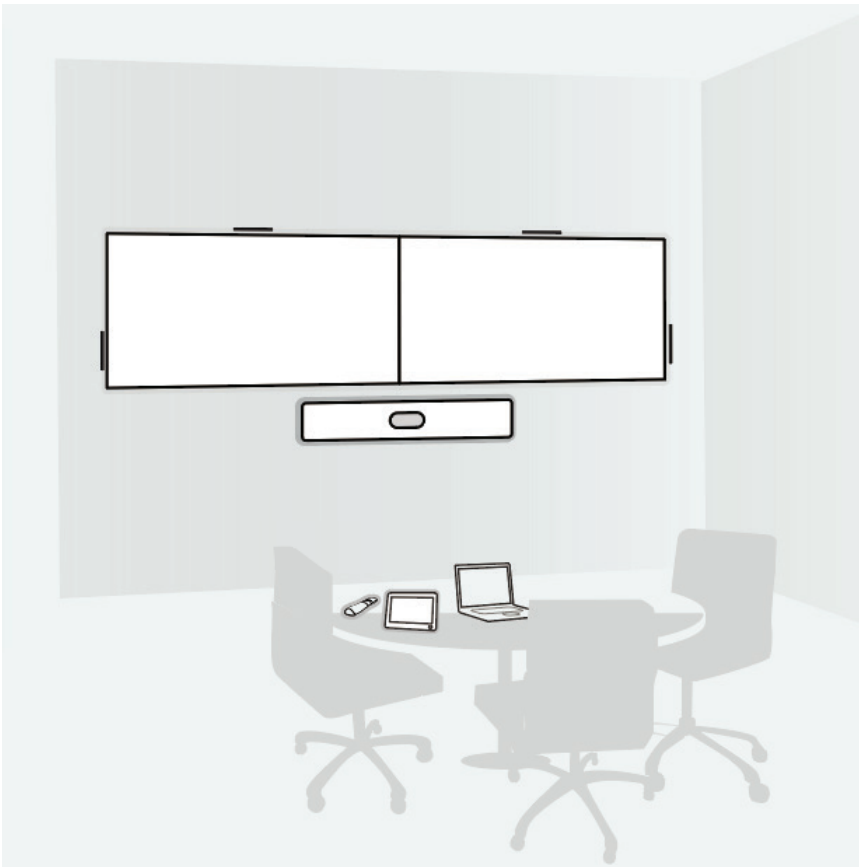

A man with grey hair, wearing a grey button-down shirt, is pointing a black laser pointer towards a large screen in the background. A woman with dark hair and glasses, wearing a pink sleeveless top, is smiling and looking at the screen. They are sitting at a wooden desk with a laptop. The background screen displays several data charts and graphs, including one with a green line and another with a blue line. The overall scene suggests a collaborative work environment.

# Recommended Mezzanine and Cisco Webex Room System Configurations

## Mezzanine 200 and Cisco Webex Room Kit/Plus

**For rooms that seat  
up to 7 people**

Close the distance between working teams and their content. When teams need to make a decision, solve a problem, or respond to a situation, they do their best work when they are able to combine their knowledge and consider all of their options. Mezzanine 200 helps teams present and explore content from different locations and sources at the same time, increasing team efficiency and performance.

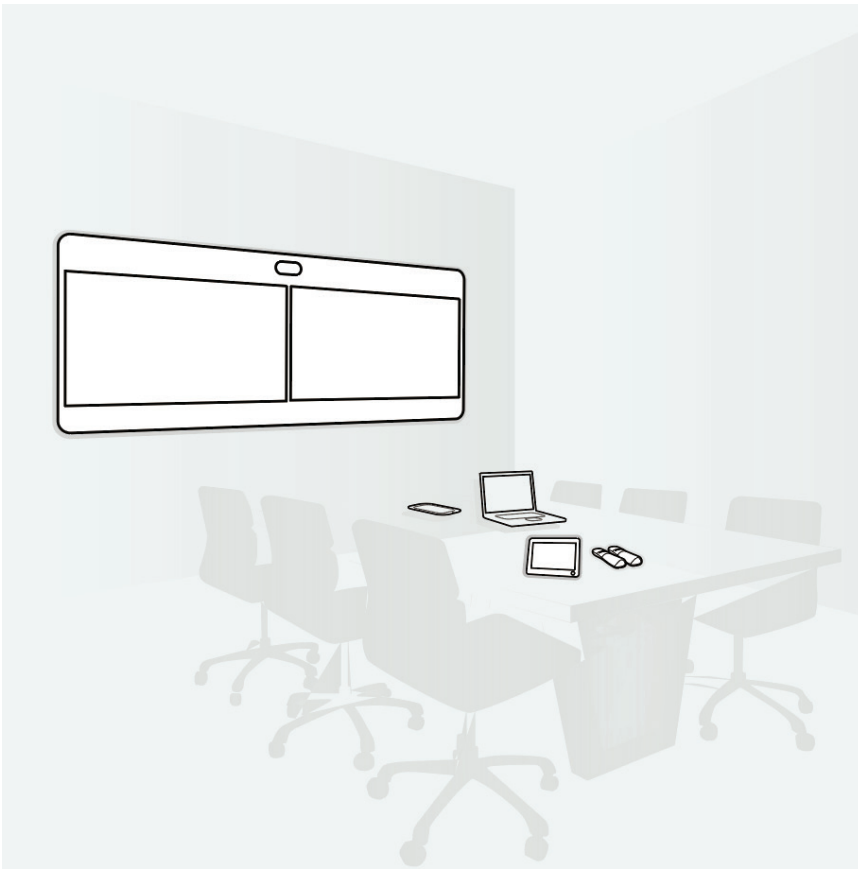

## Mezzanine 300 and Cisco Webex Room Kit Plus/Pro

**For rooms with up to 14 people**

Fill the room with all the content you need to perform at your best. Getting the right people together with the right information is more challenging than ever. Teams are distributed across locations and information is scattered across multiple sources and applications. Mezzanine 300 features three displays, providing teams with an immersive sandbox for all of their content and data.

## Mezzanine 200 and Cisco Webex Room 55 Dual/70 G2 Dual

**For larger rooms with up  
to 14 people and complex  
video deployments**

Your flagship video conferencing installations demand a higher caliber experience. Bring multi-share collaboration to your most critical meetings and presentations. Everyone can share what they need to share, and see what they need to see, with ultra-high-definition video and imagery. See the big picture and the finest details in a content-rich setting for teams to do their most important work.

## Mezzanine 300, Cisco Webex Room 55 Dual/70 G2 Dual and Webex Board

**For boardrooms,  
briefing centers, and  
very large rooms**

Why limit your ideas to a single slide when you have an entire room at your disposal? Create a captivating environment for collaborative work and customer engagement with a digital corkboard. Spread your work from wall to wall to engage and impress your audience. You can even integrate a Cisco Webex Board as a corkboard to add annotation and whiteboarding to your Mezzanine environment.

# Suggested Use Cases

Multi-share collaboration is a new way to work that unleashes the power of your workforce to increase productivity and performance. Using Mezzanine and Cisco Webex solutions together creates an ideal environment for teams to perform at their best.

## Improving Team Productivity

Team productivity is about more than meeting efficiency, it's about employee engagement and empowering teams to solve problems with speed and confidence to outpace the competition.

### Why is Mezzanine the right solution?

Multi-stream collaboration accelerates a team's ability to exchange and process information.

Simultaneous content sharing means sharing can support the conversation and not interrupt it.

Concurrent interaction enables and encourages active participation to increase team performance.

## Data-Driven Decision-Making

From marketing analytics to IoT, data is driving digital business forward. We need collaboration tools that help teams visualize and navigate the abundance of data now available.

### Why is Mezzanine the right solution?

See content side-by-side to compare and cross-reference multiple datasets simultaneously.

Present up to 10 live video sources so crucial real-time data and applications are accessible.

Visually orchestrate your content across multiple screens so everyone gets the big picture.

## Multi-Site Collaboration

Today's workforce is spread across different countries, cities, offices, co-working spaces, and homes. Distributed teams need to perform as well as they would if they were face-to-face.

### Why is Mezzanine the right solution?

Different rooms share the same visual workspace so everyone gets on the same page and works like they're side-by-side.

Seamless integration with Cisco Webex Room Systems facilitates adoption and minimizes disruption to your enterprise.

The Mezzanine user interface is consistent with the look, feel, and calling behaviors of Cisco devices so all meetings start from a place of familiarity.

## Customer Engagement

Whether it's a briefing room or a general meeting space, you want to make a statement and enable deeper levels of engagement than just presenting a slideshow.

### Why is Mezzanine the right solution?

When you combine multiple inputs with multiple screens, you have new ways to explore and present content.

Captivate your audience by integrating graphics and connected devices instead of showing a standard presentation deck.

Orchestrate multiple streams of content to encourage visual thinking and accelerate understanding, communication, and recall.
