# UTELOGY'S U-AUTOMATE

Workspace Automation For All Your Connected Devices

Utelogy's management portal, U-Manage, provides enterprise-wide visibility to rooms, equipment, issues, performance, and usage. The portal allows operations teams to drill down to see device metrics, documents, and events for all its connected devices.

U-Automate is the latest product to be added to the Utelogy platform. Automation is defined as the use of machines and technology to enable processes to run independently without manpower. This functionality is made possible by U-Automate. It is designed to eliminate the costly, time-consuming, and resource-intensive manual processes enterprises employ today.

ROOM READINESS POWERED BY U-AUTOMATE

Room Readiness allows organizations to check device connectivity, ensure video and audio are working, and power on (or off) all devices automatically with just a few clicks of a button. Utelogy's Room Readiness takes advantage of the script building and scheduling features of U-Automate to create and schedule tests to run for any number of rooms at any location(s), any time of day.

Automation delivers an enhanced user experience and allows organizations to focus their human resources on more strategic, core business activities.

U-AUTOMATE FEATURES

U-Automate delivers the following features to improve productivity for the IT organization:

SCRIPT BUILDER
Build scripts by configuring blocks with the ability to enter custom parameters

SCRIPT SCHEDULER
Schedule scripts to execute and repeat at any date, time and location

AUTOMATE TESTING
Automate the testing of devices, video and audio calls, state checks, custom macros, and more.

TEST LOGS
Review test logs to proactively address errors and warnings
